This technology will change the way the game plays on all platforms, unlike any other FIFA title to date. This will push the limits of player control and motion on the ball to new heights. In the development of the new engine, Forza Horizon 3 tech was used as its core. To make sure it worked well in the FIFA world, an experienced team from the Forza Horizon 3 tech team worked on FIFA 22, along with a number of Forza tech lead engineers, to ensure a seamless transition in the gaming engine. "We are making the most realistic game we have ever created, using the data from our real-life player motion captures - we're now using the player behaviour from their actual matches to create a completely authentic FIFA experience," said Patrick Kyle, executive producer at EA. "This technology is an example of how we're committed to continuing to improve the game and evolve the way we develop, simulate and game. Our technology continues to evolve as we talk to fans about their wants and needs." FIFA 22 will be available on Xbox One, PlayStation 4 and PC on September 27, and Xbox 360 and PS3 on September 11. Imagine going to a costume shop and having the expert costume jewellery maker take out his tools and start painting your costume ring. Now imagine that it only takes him 3-4 hours, maybe even less, and your ring is done. Sounds

too good to be true? Well, it is true, and it is in Manila. I met this man by the name of Felix, who works as a jeweller at a costume shop named Dress2Be, in the middle of the city. He made custom jewellery for me that I can't even begin to describe. It took him less than 3-4 hours and I was amazed by the quality of his work. Ladies, if you are a party-goer and love to go all out, I suggest you go see Felix at Dress2Be and get him to make you custom jewellery. You might need to get there early, as all of his custom orders take a minimum of 3-4 hours to complete. He starts at 9am to 10am and then finishes until 2pm and does weddings too, if you contact him. In my first two visits to the shop, I saw there
